(54) CONTROL CIRCUIT IN PERMANENT MAGNET MOTOR**(57)Abstract:**

PURPOSE: To lower a generation brake power and prevent the damage of a cona contactor without short-circuiting the armature in which voltage is produced directly by the contactor in the resistor type control device in a permanent magnet type d.c. motor.

LEGAL STATUS

[Date of request for examination]
[Date of sending the examiner's decision of rejection]
[Kind of final disposal of application other than the
examiner's decision of rejection or application
converted registration]
[Date of final disposal for application]
[Patent number]
[Date of registration]
[Number of appeal against examiner's decision of
rejection]
[Date of requesting appeal against examiner's decision
of rejection]
[Date of extinction of right]
